SERNEM · HSE

DART

Days away, restricted work or job transfer cases.

Use a decimal point or comma; no thousands separators.

Calculation inputs

DART cases (whole number)

3

Actual hours worked

200000

Result

3.00 **cases / 200,000 hours**

Review the methodology and limits below before interpreting this result.

Example: 3 cases / 200,000 h = 3.00. Invalid: zero hours → no result.

Methodology & limits

```
DART = cases × 200,000 / hours
```

Count recordable cases involving days away, restricted work or job transfer, once per case. This is not a count of days. Use the same period and workforce as the hours.

Calculated at full precision; display rounded to two decimal places only.
