

CHEMICAL TRANSFER AND DECANTING TOOLBOX TALK

Chemical transfer can create exposure, reaction and identification hazards.

PURPOSE AND SCOPE

Prevent splashes, incompatible reactions, spills, incorrect containers and missing labels during chemical transfer.

KEY HAZARDS

1  Chemical splash.	2  Vapour inhalation.	3  Incompatible reactions.	4  Incorrect container use.
5  Unlabelled secondary containers.	6  Static electricity.	7  Spills.	8  Inadequate PPE.

CRITICAL POINTS TO VERIFY IN THE FIELD

01 Chemical splash.	02 Vapour inhalation.	03 Incompatible reactions.

REMEMBER — SERNEM

S

Stop and think

E

Evaluate the risk

R

Remove or reduce

N

Never assume

E

Ensure protection

M

Monitor and communicate

CHEMICAL TRANSFER AND DECANTING TOOLBOX TALK

Chemical transfer can create exposure, reaction and identification hazards.

FIELD REQUIREMENTS AND VERIFICATION

Prevent splashes, incompatible reactions, spills, incorrect containers and missing labels during chemical transfer.

SERNEM FIELD 01
FIELD VERIFICATION 1
SDS available

SERNEM FIELD 02
FIELD VERIFICATION 2
Compatibility checked

SERNEM FIELD 03
FIELD VERIFICATION 3
Transfer equipment suitable

SERNEM FIELD 04
FIELD VERIFICATION 4
Container suitable

VERIFICATION BEFORE START

- | | |
|--|--|
| ☐ SDS available | ☐ Compatibility checked |
| ☐ Transfer equipment suitable | ☐ Container suitable |
| ☐ Label applied | ☐ Bonding assessed |

SUPERVISOR DISCUSSION POINTS

- Is the SDS available?
- Are the chemicals compatible?
- Is the container suitable?

FIELD APPLICATION

Chemical transfer can create exposure, reaction and identification hazards.

CHEMICAL TRANSFER AND DECANTING TOOLBOX TALK

Chemical transfer can create exposure, reaction and identification hazards.

CRITICAL CONTROL MEASURES

1. ELIMINATE / REDUCE THE RISK

Review the SDS. • Apply bonding and grounding where required. • Close containers after transfer.

2. ENGINEERING & PHYSICAL CONTROLS

Confirm chemical compatibility. • Provide splash protection. • Manage waste correctly.

3. WORK METHOD & FIELD CONTROLS

Use suitable transfer equipment. • Wear suitable gloves, goggles and face protection.

4. PPE, VERIFICATION & SUPERVISION

Label secondary containers before use. • Keep spill kits ready.

CRITICAL WARNING

Team, chemical identity must be maintained throughout the transfer. We will use compatible equipment, apply bonding or grounding where required, label secondary containers before filling and keep spill controls ready.

SITE CHECKLIST — BEFORE STARTING WORK

- | | |
|--|--|
| ☐ SDS available | ☐ Compatibility checked |
| ☐ Transfer equipment suitable | ☐ Container suitable |
| ☐ Label applied | ☐ Bonding assessed |
| ☐ PPE suitable | ☐ Spill kit ready |
| ☐ Ventilation adequate | ☐ Crew briefed |

CHEMICAL TRANSFER AND DECANTING TOOLBOX TALK

Chemical transfer can create exposure, reaction and identification hazards.
