CRITICAL CONTROL MEASURES

1. ELIMINATE / REDUCE THE RISK

Secure the workpiece. • Assess glove use around rotating equipment. • Provide adequate lighting.

2. ENGINEERING & PHYSICAL CONTROLS

Use suitable tools instead of hands. • Keep hands outside the cutting line. • Reassess risk if the work method changes.

3. WORK METHOD & FIELD CONTROLS

Control sharp edges. • Use heat-resistant gloves for hot surfaces.

4. PPE, VERIFICATION & SUPERVISION

Select suitable cut-resistant gloves. • Do not use damaged hand tools.

CRITICAL WARNING

Team, today our hands will remain in safe positions. Workpieces will be secured, suitable tools used and no one will place hands in cutting or pinch zones.
