

STOP WORK AUTHORITY TOOLBOX TALK

PURPOSE AND SCOPE

Ensure every worker can immediately stop work when a serious or uncontrolled hazard is identified and that work restarts safely.

KEY HAZARDS

1  Uncontrolled energy.	2  People entering danger zones.	3  Changing work conditions.	4  Deviation from permits or procedures.
5  Damaged safety equipment.	6  Inadequate barricading.	7  Unclear instructions or communication.	8  Continuing unsafe work because of production

CRITICAL POINTS TO VERIFY IN THE FIELD

01 Uncontrolled energy.	02 People entering danger zones.	03 Changing work conditions.
--	---	---

REMEMBER — SERNEM

S

Stop and think

E

Evaluate the risk

R

Remove or reduce

N

Never assume

E

Ensure protection

M

Monitor and communicate

FIELD REQUIREMENTS AND VERIFICATION

Ensure every worker can immediately stop work when a serious or uncontrolled hazard is identified and that work restarts safely.

SERNEM FIELD 01
FIELD VERIFICATION 1
SWA authority explained

SERNEM FIELD 02
FIELD VERIFICATION 2
Crew understands authority

SERNEM FIELD 03
FIELD VERIFICATION 3
Stop method clear

SERNEM FIELD 04
FIELD VERIFICATION 4
Energy can be made safe

VERIFICATION BEFORE START

- | | |
|---|---|
| ☐ SWA authority explained | ☐ Crew understands authority |
| ☐ Stop method clear | ☐ Energy can be made safe |
| ☐ Supervisor communication clear | ☐ Reassessment method clear |

SUPERVISOR DISCUSSION POINTS

- Who can use Stop Work Authority?
- When should work be stopped?
- What is the first action after stopping?

FIELD APPLICATION

Ensure every worker can immediately stop work when a serious or uncontrolled hazard is identified and that work restarts safely.

STOP WORK AUTHORITY TOOLBOX TALK

CRITICAL CONTROL MEASURES

1. ELIMINATE / REDUCE THE RISK

Clearly support every worker's authority to stop work. • Inform the relevant supervisor and crews. • Rebrief the crew before restart.

2. ENGINEERING & PHYSICAL CONTROLS

Stop the task safely when Stop Work is called. • Reassess the hazard. • Restart only after safe conditions are verified.

3. WORK METHOD & FIELD CONTROLS

Place energy or equipment in a safe condition. • Implement required controls.

4. PPE, VERIFICATION & SUPERVISION

Control the hazard area. • Update permits or risk assessments where necessary.

CRITICAL WARNING

Team, everyone here has the authority to stop work. If you see a serious or uncontrolled hazard, stop the task. No one will be blamed for using Stop Work for a genuine safety concern.

SITE CHECKLIST — BEFORE STARTING WORK

- | | |
|---|---|
| ☐ SWA authority explained | ☐ Crew understands authority |
| ☐ Stop method clear | ☐ Energy can be made safe |
| ☐ Supervisor communication clear | ☐ Reassessment method clear |
| ☐ Control process clear | ☐ Permit update considered |
| ☐ Restart approval clear | ☐ No-retaliation expectation explained |
