

SCAFFOLD SAFETY TOOLBOX TALK

Check the tag, access and platform before climbing.

5-10 MINUTES

OBJECTIVE

Review scaffold tags, safe access, platforms, edge protection, loading and unauthorized modification risks with the team.

KEY HAZARDS

- Using an invalid or red-tagged scaffold.
- Missing platforms, guardrails or toe boards.
- Unsafe access or climbing scaffold guardrails.
- Overloading or unauthorized modification.

CONTROL MEASURES

- Verify the scaffold tag and current inspection status.
- Inspect platforms, guardrails, toe boards and access ladders.
- Do not overload the scaffold or store unnecessary materials on it.
- Do not remove components; report defects to the authorized scaffold team.

DISCUSSION QUESTIONS

- What is the status of this scaffold tag?
- Where is the approved access point?
- Who will you notify if a defect is found?
