

WORKING AT HEIGHT TOOLBOX TALK

Control fall hazards before work begins.

5-10 MINUTES

OBJECTIVE

Confirm safe access, fall protection, anchorage, dropped-object controls and rescue readiness with the work team before starting.

KEY HAZARDS

- Falls from unprotected edges or openings.
- Unsafe ladders, scaffolds or working platforms.
- Incorrect anchorage, damaged harnesses or unsuitable lanyards.
- Tools and materials falling onto personnel below.

CONTROL MEASURES

- Use guardrails, safe platforms and collective protection first.
- Inspect harnesses, lanyards and anchorage points before use.
- Maintain continuous attachment where required and use approved anchorage.
- Secure tools, barricade the area below and confirm the rescue plan.

DISCUSSION QUESTIONS

- Where is the approved access route for today's task?
- Which anchorage points are approved?
- How will a suspended worker be rescued?
