

LADDER CRITICAL SAFETY RULES

SELECTION • INSPECTION • SETUP • SAFE USE

INSPECT THE LADDER BEFORE USE

01

INSPECT THE LADDER

- Check rungs, side rails, feet and connections before use.

02

SELECT THE RIGHT LADDER

- Use the correct ladder type and sufficient length for the task.

03

USE STABLE GROUND

- Place the ladder on firm, level and non-slip ground.

04

MAINTAIN THE CORRECT ANGLE

- Use approximately a 4:1 setup ratio for leaning ladders.

05

MAINTAIN 3-POINT CONTACT

- Maintain three points of contact while climbing.

06

DO NOT OVERREACH

- Keep your body between the ladder side rails.

07

PROTECT THE WORK AREA

- Barricade ladders exposed to doors, vehicles or pedestrian traffic.

08

STOP IF UNSAFE

STOP WORK IMMEDIATELY

- ✓ The ladder is damaged
- ✓ The surface is unstable or slippery
- ✓ The ladder cannot be positioned safely
- ✓ Weather or surrounding conditions are unsafe
