

CONFINED SPACE ENTRY CHECKLIST

FIELD INSPECTION DOCUMENT

Project / Site	Date / Time	Inspector
Location / Area	Confined Space Permit No.	Company / Contractor

1

PERMIT AND AUTHORIZATION

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
1	A valid confined space entry permit has been issued for the exact space, task, personnel and entry period.	☐	☐	☐	CRITICAL	
2	The approved permit accurately describes the work scope, hazards, isolations and required controls.	☐	☐	☐	CRITICAL	
3	All required authorizations, approvals and signatures have been completed before entry.	☐	☐	☐	CRITICAL	
4	A task-specific risk assessment or JSA has been completed and communicated to the entry team.	☐	☐	☐	CRITICAL	
5	Simultaneous operations and nearby activities have been reviewed and coordinated.	☐	☐	☐	CRITICAL	

2

SPACE IDENTIFICATION AND ACCESS

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
6	The confined space is clearly identified and unauthorized entry is prevented.	☐	☐	☐	CRITICAL	
7	The entry point and surrounding area are barricaded or otherwise controlled.	☐	☐	☐	STANDARD	
8	Safe access and egress are provided and kept clear throughout the work.	☐	☐	☐	CRITICAL	
9	Openings, covers and hatches are secured against unintended movement or closure.	☐	☐	☐	CRITICAL	
10	Suitable and safe lighting is provided for entry, work and emergency evacuation.	☐	☐	☐	STANDARD	

3

ISOLATION AND ENERGY CONTROL

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
11	All connected process lines, equipment and energy sources have been identified.	☐	☐	☐	CRITICAL	

3

ISOLATION AND ENERGY CONTROL

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
12	Required lockout and tagout controls have been applied and independently verified.	☐	☐	☐	CRITICAL	
13	Positive isolation such as blanking, blinding or physical disconnection is used where required.	☐	☐	☐	CRITICAL	
14	Stored pressure, liquids, gases, heat and other residual energy have been safely released.	☐	☐	☐	CRITICAL	
15	Rotating, moving or mechanically driven equipment is immobilized and secured.	☐	☐	☐	CRITICAL	
16	Electrical equipment within or connected to the space is isolated or protected as required.	☐	☐	☐	CRITICAL	

4

CLEANING AND PREPARATION

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
17	The space has been drained, cleaned, purged or flushed as required.	☐	☐	☐	CRITICAL	
18	Hazardous residues, sludge, scale and deposits have been assessed and controlled.	☐	☐	☐	CRITICAL	
19	Inlets, outlets, drains and overflow routes that could introduce hazards are controlled.	☐	☐	☐	CRITICAL	

5

ATMOSPHERIC TESTING

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
20	The gas detector is suitable, functional, bump-tested and within its calibration period.	☐	☐	☐	CRITICAL	
21	Atmospheric testing is performed by a trained and authorized person.	☐	☐	☐	CRITICAL	
22	The atmosphere has been tested before entry at appropriate levels and locations.	☐	☐	☐	CRITICAL	
23	Oxygen concentration is within the site-approved safe range.	☐	☐	☐	CRITICAL	
24	Flammable gas or vapor concentration is within the permitted entry limit.	☐	☐	☐	CRITICAL	
25	Relevant toxic gases, vapors and contaminants are below the permitted exposure limits.	☐	☐	☐	CRITICAL	

5 ATMOSPHERIC TESTING

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
26	Gas test results, time, location and tester details are recorded on the permit.	☐	☐	☐	CRITICAL	
27	Continuous or periodic atmospheric monitoring is provided as required.	☐	☐	☐	CRITICAL	

6 VENTILATION

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
28	Natural or mechanical ventilation is adequate for the identified hazards.	☐	☐	☐	CRITICAL	
29	Ventilation supplies clean air and does not introduce exhaust fumes or contaminants.	☐	☐	☐	CRITICAL	
30	Required mechanical ventilation remains operating throughout occupancy.	☐	☐	☐	CRITICAL	
31	Ventilation ducting is positioned effectively and does not obstruct access or rescue.	☐	☐	☐	STANDARD	

7 ATTENDANT AND ENTRY CONTROL

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
32	A trained confined space attendant is assigned and remains outside the space.	☐	☐	☐	CRITICAL	
33	The attendant has no other duty that interferes with continuous monitoring.	☐	☐	☐	CRITICAL	
34	An accurate entry and exit register is maintained for all entrants.	☐	☐	☐	CRITICAL	
35	Reliable communication is established between entrants and the attendant.	☐	☐	☐	CRITICAL	
36	The attendant understands when to stop work, order evacuation and raise the alarm.	☐	☐	☐	CRITICAL	

8 ENTRANT COMPETENCE AND PPE

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
37	All entrants are trained, authorized and medically fit where required.	☐	☐	☐	CRITICAL	
38	Entrants have received a task-specific briefing and understand the hazards and controls.	☐	☐	☐	CRITICAL	

8 ENTRANT COMPETENCE AND PPE

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
39	Required PPE is available, suitable and correctly worn.	☐	☐	☐	CRITICAL	
40	Respiratory protection is selected, fit-tested and used where required.	☐	☐	☐	CRITICAL	
41	A full-body harness and retrieval connection are used where required by the rescue plan.	☐	☐	☐	CRITICAL	

9 TOOLS AND EQUIPMENT

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
42	Electrical and work equipment are suitable for the classified area and environmental conditions.	☐	☐	☐	CRITICAL	
43	Low-voltage, protected or intrinsically safe equipment is used where required.	☐	☐	☐	CRITICAL	
44	Tools, cables, hoses and equipment have been inspected and are free from visible defects.	☐	☐	☐	CRITICAL	
45	Compressed gas cylinders are kept outside the confined space unless specifically authorized.	☐	☐	☐	CRITICAL	

10 SPECIAL WORK CONDITIONS

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
46	Hot-work controls and a separate hot-work permit are in place where applicable.	☐	☐	☐	CRITICAL	
47	Chemicals, coatings, cleaning agents and fumes generated by the task have been assessed.	☐	☐	☐	CRITICAL	
48	Heat stress, work duration, rest breaks and hydration requirements have been assessed.	☐	☐	☐	STANDARD	

11 RESCUE AND EMERGENCY PREPAREDNESS

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
49	A space-specific rescue plan has been prepared and is immediately available.	☐	☐	☐	CRITICAL	
50	A competent rescue team is available and can respond within the required time.	☐	☐	☐	CRITICAL	
51	Required rescue equipment is positioned, inspected and ready for immediate use.	☐	☐	☐	CRITICAL	

11 RESCUE AND EMERGENCY PREPAREDNESS

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
52	Non-entry retrieval is provided where practicable and does not create additional risk.	☐	☐	☐	CRITICAL	
53	The entry opening and surrounding area allow effective rescue and casualty handling.	☐	☐	☐	CRITICAL	
54	The method for raising the alarm and contacting emergency response is tested and understood.	☐	☐	☐	CRITICAL	

12 FINAL AUTHORIZATION

#	Inspection Item	YES	NO	N/A	Priority	Comments / Action
55	All entrants, attendants, supervisors and rescuers are identified before entry.	☐	☐	☐	CRITICAL	
56	Permit conditions, isolations, atmosphere, ventilation and rescue readiness have been rechecked.	☐	☐	☐	CRITICAL	
57	The team understands the conditions requiring immediate evacuation or work suspension.	☐	☐	☐	CRITICAL	
58	All critical controls are verified and the confined space is ready for authorized entry.	☐	☐	☐	CRITICAL
