

FIRE SAFETY TOOLBOX TALK

Prevent fire hazards and respond safely in emergencies.

8-10 MINUTES

OBJECTIVE

Prevent fires, support early response and ensure safe evacuation of personnel.

TOPIC EXPLANATION

- Fire requires fuel, oxygen and heat. Removing one of these elements helps prevent or control fire.
- Store flammable materials correctly, manage hot work under permit and keep extinguishers accessible.
- Everyone must know alarm points, escape routes and assembly areas.

REALISTIC SITE SCENARIO

- Grinding sparks ignited nearby combustible materials.
- A nearby extinguisher allowed the fire to be controlled quickly.
- Good housekeeping and spark protection would have prevented the incident.

REMEMBER

Preventing a fire is always safer than fighting one.

FIRE SAFETY TOOLBOX TALK

Fire hazards, control measures and emergency preparedness.

8-10 MINUTES

KEY HAZARDS

- Hot work
- Flammable liquids
- Gas leaks
- Electrical faults
- Smoking
- Poor housekeeping
- Overloaded circuits
- Improper storage

CONTROL MEASURES

- Apply Hot Work Permit.
- Remove combustible materials.
- Inspect fire extinguishers.
- Keep escape routes clear.
- Assign a fire watch.
- Report electrical defects.
- Maintain good housekeeping.
- Store gas cylinders correctly.
- Know the PASS method.
- Evacuate when alarms sound.

SUPERVISOR TALKING SCRIPT

Today we will verify hot work controls, extinguishers and escape routes. Everyone must know the nearest alarm point and assembly area.

DISCUSSION QUESTIONS

- Where is the nearest extinguisher?
- Where is the assembly point?
- Is a Hot Work Permit required?
- How do you raise the alarm?
- What is the PASS method?
- Is the escape route clear?

VERIFY BEFORE STARTING TODAY

- | | |
|---|---|
| ☐ Extinguisher available | ☐ Escape routes clear |
| ☐ Alarm point known | ☐ Combustibles removed |
| ☐ Permit ready | ☐ Fire watch assigned |
| ☐ Housekeeping good | ☐ Gas cylinders secure |
| ☐ Team briefed | ☐ Assembly point known |
